

Bennyhin Bapanapalli

East Hanover, NJ | bennyhin777@gmail.com | <https://ad3.org/>

PROFESSIONAL SUMMARY

Risk and AI Business Analyst with experience across payment risk, fraud prevention, strategy and analytics, operational resilience, and human-in-the-loop AI. Skilled in SQL, Python, Tableau, Power BI, Looker, requirements gathering, risk controls, statistical analysis, dashboard design, and cross-functional delivery. Translates complex data and stakeholder needs into explainable decisions, measurable controls, and actionable recommendations.

CORE SKILLS

Data and Analytics: SQL, Python, Advanced Excel, Statistical Analysis, A/B Testing, Data Wrangling, Exploratory Data Analysis, Hypothesis Testing, Data Pipeline Optimization

AI and Machine Learning: Predictive Modeling, AI-Driven Forecasting, Feature Engineering, Model Evaluation, Scikit-learn, Random Forest, Generative AI, LLM Tools, Prompt Engineering, Heuristic-to-Model Migration

Risk and Fraud: Anomaly Detection, Rule-Based and Model-Driven Risk Controls, Root Cause Analysis, AML/KYC Awareness, Chargeback and Dispute Analysis, Blockchain Analytics, Identity Verification Data Analysis

Business Analysis: Requirements Gathering, Process Mapping, Stakeholder Management, User Stories, Gap Analysis, Business Process Optimization, Executive Reporting, Agile, Scrum, Kanban, SDLC, UAT

Tools: Tableau, Power BI, Looker, Lucidchart, Jira, Zendesk, Confluence, Git, Salesforce CRM, Google Workspace

PROFESSIONAL EXPERIENCE

Strategy and Analytics Business Analyst — Stripe

Nov 2023 – Jul 2024

- Used SQL and Python to analyze complex financial datasets, identify revenue opportunities, and improve payment routing decisions.
- Designed Tableau and Looker dashboards to monitor KPIs and regional product adoption.
- Applied AI strategy and predictive modeling to forecast transaction volumes, identify market trends, and improve operational efficiency.
- Conducted A/B testing and statistical analysis to evaluate feature rollouts and inform product strategy.
- Partnered with engineering teams in Agile/Scrum environments to improve data pipelines and reduce manual reporting.
- Presented analytical findings and recommendations to executive stakeholders.

CAP Analyst — Concession Abuse Prevention — Amazon

May 2023 – Oct 2023

- Queried transactional datasets with SQL and Excel to detect fraud patterns and unauthorized access behavior.
- Tracked emerging security risks through Tableau and Power BI reporting to support proactive mitigation.
- Managed high-volume case queues and escalated security tickets through Jira and Zendesk.
- Applied root cause analysis and risk modeling to reduce account takeover and social engineering exposure.
- Collaborated with cross-functional teams to improve automated fraud detection workflows.
- Maintained process maps, technical documentation, and compliance audit logs.

Payment Risk Analyst — Coinbase

Sep 2020 – Apr 2023

- Analyzed fraud risk across ACH, card, and real-time payment rails using SQL and transaction monitoring data.
- Designed and tuned risk controls, supporting the transition from heuristic rules to model-driven mitigation.
- Investigated fraud vectors using identity-provider data, Python, and blockchain analytics.
- Evaluated risk strategy performance through rule precision, recall, Looker, and Tableau reporting.
- Partnered with Product and Engineering to improve fraud prevention while maintaining customer experience.

SELECTED PROJECTS

Payment Risk Command Center

GitHub repository

React · Vite · Payment risk monitoring · Dashboard design

Interactive decision workspace for portfolio exposure, transaction risk signals, searchable decision queues, payment-rail analysis, and fraud-loss tradeoffs.

Fraud Policy Simulator

GitHub repository

React · Vite · Scenario modeling · Risk strategy

Scenario simulator for testing auto-review thresholds and comparing legitimate approvals, fraud loss prevented, and manual review volume before production changes.

Requirements-to-Risk Analyst

GitHub repository

React · Vite · AI-assisted analysis · Requirements engineering

Human-in-the-loop analysis tool that converts stakeholder transcripts into user stories, risk controls, detected tensions, and clarification questions.

KRI Early-Warning System

GitHub repository

React · Vite · KRI monitoring · Operational risk

Operational risk monitoring experience with threshold-based indicators, owner-assigned actions, health levels, trend tracking, and action digest generation.

EDUCATION

Master of Science in Project Management (Information Technology) — Saint Francis College

Graduated with Honors · 3.9 GPA · Capstone: Agile Methodologies

CERTIFICATIONS

- Google Project Management: Professional Certificate — Google
- IBM Business Analyst Professional Certificate — IBM
- Enterprise Risk Management Specialization — University System of Georgia
- Forensic Accounting and Fraud Examination Specialization — West Virginia University
- Financial Risk Management Specialization — New York Institute of Finance

PUBLICATION

A Mechanism Used to Predict Diet Consumption and Stress Management in Humans Using IoMT — IEEE ICCT 2023. Co-authored an IoMT-based framework distinguishing normal eating from stress-induced eating.
