

Bennyhin Bapanapalli

East Hanover, NJ | bennyhin777@gmail.com | v0-bennyhin.vercel.app

PROFESSIONAL SUMMARY

Results-driven professional with deep expertise in artificial intelligence, data strategy, and business analysis within high-growth fintech and technology environments. Proven ability to bridge technical capabilities and business objectives through predictive modeling, process optimization, and cross-functional collaboration. Combines an MS in IT Project Management with hands-on experience in AI-driven forecasting, fraud risk analytics, machine learning evaluation, and enterprise data strategy at industry-leading organizations including Stripe, Amazon, and Coinbase. Skilled in translating complex analytical findings into actionable recommendations that protect revenue, accelerate growth, and enhance operational efficiency.

SKILLS

- **Data & Analytics:** SQL, Python, Advanced Excel, Statistical Analysis, A/B Testing, Data Wrangling, Exploratory Data Analysis, Hypothesis Testing, Data Pipeline Optimization
- **AI & Machine Learning:** Predictive Modeling, AI-Driven Forecasting, Feature Engineering, Model Evaluation (Precision / Recall / F1), Scikit-learn, Random Forest, Generative AI / LLM Tools, Prompt Engineering, Heuristic-to-Model Migration
- **Risk & Fraud:** Transaction Monitoring, Anomaly Detection, Rule-Based & Model-Driven Risk Controls, Root Cause Analysis (RCA), AML / KYC Awareness, Chargeback & Dispute Analysis, Blockchain Analytics, Identity Verification Data Analysis
- **Visualization & BI:** Tableau, Power BI, Looker, Lucidchart, Dashboard Design, KPI Reporting, Executive Presentation Design
- **Business Analysis:** Requirements Gathering, Process Mapping, Stakeholder Management, User Stories, Gap Analysis, Business Process Optimization, Cross-Functional Collaboration, Executive Reporting, Agile / Scrum / Kanban, SDLC, UAT
- **Tools & Platforms:** Jira, Zendesk, Confluence, Git, Salesforce (CRM), Google Workspace

PROFESSIONAL EXPERIENCE

Strategy & Analytics Business Analyst — Stripe

Nov 2023 – Jul 2024

- Drove data-driven strategy initiatives by utilizing SQL and Python to extract actionable insights from complex financial datasets, identifying opportunities to optimize revenue streams and improve payment routing.
- Designed and deployed interactive dashboards using Tableau and Looker to monitor key performance indicators (KPIs) and track regional product adoption metrics.
- Integrated enterprise AI strategies and predictive modeling techniques to forecast transaction volumes, detect emerging market trends, and enhance operational efficiency across the platform.
- Conducted rigorous A/B testing and statistical analysis to evaluate the impact of new feature rollouts, directly informing and guiding technical product strategy decisions.
- Collaborated with cross-functional engineering teams using Agile/Scrum methodologies to streamline data pipelines, ensuring high data integrity and reducing manual reporting overhead.
- Translated complex analytical findings into clear, executive-level presentations, providing leadership with actionable recommendations for scaling Web3 advertising and digital payment infrastructure.

CAP Analyst — Concession Abuse Prevention — Amazon

May 2023 – Oct 2023

- Queried and analyzed complex transactional datasets using SQL and Excel to detect fraudulent patterns and unauthorized access behaviors.
- Tracked and reported on emerging security risks using Tableau and Power BI visualizations, enabling proactive risk mitigation.
- Managed high-volume case queues and escalated security tickets utilizing enterprise CRM and ticketing systems (Jira, Zendesk).
- Applied root cause analysis (RCA) and risk modeling concepts to proactively secure accounts against unauthorized access and social engineering attacks.

- Collaborated in Agile environments with cross-functional teams to optimize automated fraud-detection workflows and system rules.
- Maintained detailed technical documentation, process maps, and compliance audit logs within internal knowledge bases.

Payment Risk Analyst — Coinbase

Sep 2020 – Apr 2023

- Analyzed and mitigated fraud risk across high-volume fiat payment rails (ACH, cards, and real-time payments), utilizing SQL to query large datasets and identify anomalous transaction patterns.
- Designed and tuned risk controls, leading the transition from heuristic-based rules to model-driven mitigation strategies in collaboration with Data Science and Machine Learning teams.
- Investigated complex fraud vectors utilizing identity-provider data, Python, and blockchain analytics, proactively closing monitoring gaps to minimize financial loss.
- Evaluated the financial impact of risk strategies by tracking rule precision and recall, synthesizing complex datasets into actionable insights using Looker and Tableau.
- Optimized end-to-end fraud prevention operations, partnering cross-functionally with Product and Engineering to enforce stringent compliance while maintaining a seamless user experience.

EDUCATION

MS in Project Management (IT) — Saint Francis College

Graduated with Honors — 3.9 GPA | Capstone: Agile Methodologies

CERTIFICATIONS

- Google Project Management: Professional Certificate — Google
- IBM Business Analyst Professional Certificate — IBM
- Enterprise Risk Management Specialization — University System of Georgia
- Forensic Accounting and Fraud Examination Specialization — West Virginia University
- Financial Risk Management Specialization — New York Institute of Finance

PUBLICATIONS

- A Mechanism Used to Predict Diet Consumption and Stress Management in Humans Using IoMT — IEEE ICDDT, 2023. Co-authored an IoMT-based framework distinguishing normal eating from stress-induced eating.
