

Bennyhin Bapanapalli

Risk & AI Business Analyst

East Hanover, NJ | bennyhin777@gmail.com | +1 567 234 0007 | linkedin.com/in/bennyhin777

PROFESSIONAL SUMMARY

Results-driven Risk and AI Business Analyst with experience in payment risk, fraud prevention, and AI strategy. Skilled in SQL, Python, Tableau, and Power BI, with a track record of translating complex data into actionable business insights. Experienced in predictive modeling, A/B testing, stakeholder management, dashboard development, data-pipeline optimization, and Agile delivery.

CORE SKILLS

Data & Analytics: SQL, Python, Advanced Excel, Statistical Analysis, A/B Testing, Data Wrangling, Exploratory Data Analysis, Hypothesis Testing, Data Pipeline Optimization

AI & Machine Learning: Predictive Modeling, AI-Driven Forecasting, Feature Engineering, Model Evaluation, Scikit-learn, Random Forest, Generative AI, LLM Tools, Prompt Engineering, Heuristic-to-Model Migration

Risk & Fraud: Anomaly Detection, Rule-Based and Model-Driven Risk Controls, Root Cause Analysis, AML/KYC Awareness, Chargeback and Dispute Analysis, Blockchain Analytics, Identity Verification Data Analysis

Business Analysis & Tools: Requirements Gathering, Process Mapping, Stakeholder Management, User Stories, Agile, Scrum, Kanban, SDLC, UAT, Tableau, Power BI, Looker, Jira, Zendesk, Confluence, Git, Salesforce CRM

PROFESSIONAL EXPERIENCE

Strategy & Analytics Business Analyst — Stripe

New York, NY | September 2024 – Present

- Analyze complex financial datasets using SQL and Python to identify revenue opportunities and optimize payment-routing strategies.
- Develop Tableau and Looker dashboards to track KPIs and monitor product performance across multiple regions.
- Build predictive models and AI-driven forecasts to anticipate transaction volumes and identify emerging market trends.
- Design and execute A/B tests and statistical analyses to validate product strategies and inform data-driven decision making.
- Collaborate with engineering teams in Agile and Scrum environments to streamline data pipelines and eliminate manual reporting processes.
- Present findings and strategic recommendations to senior leadership with clear, actionable insights.

CAP Analyst — Amazon

Hyderabad, India | May 2023 – October 2023

- Queried large-scale transactional datasets using SQL and Excel to detect fraud patterns and identify unauthorized-access behaviors.
- Built Tableau and Power BI reports to proactively monitor security risks and support threat-detection operations.
- Managed high-volume case queues and escalated security tickets through Jira and Zendesk, ensuring timely resolution.
- Applied root-cause analysis and risk modeling techniques to reduce exposure to account takeovers and social-engineering attacks.
- Partnered with cross-functional teams to enhance automated fraud-detection workflows and improve analyst efficiency.
- Maintained process maps, technical documentation, and compliance audit materials to ensure regulatory readiness.

Payment Risk Analyst — Coinbase

Hyderabad, India | September 2020 – April 2023

- Analyzed fraud risk across ACH, card, and real-time payment rails using SQL and transaction-monitoring systems.
- Designed and refined risk controls, transitioning teams from heuristic-based rules to model-driven mitigation strategies.
- Investigated fraud vectors using identity-provider data, Python scripts, and blockchain analytics to understand attacker methodologies.
- Measured risk-strategy performance through precision, recall, Looker, and Tableau reporting.

- Collaborated with Product and Engineering teams to strengthen fraud prevention while preserving seamless customer experiences.

PROJECTS

Payment Risk Command Center

React, Vite, Payment Risk Monitoring, Dashboard Design

- Built an interactive decision workspace for portfolio exposure, transaction-risk signals, searchable decision queues, payment-rail analysis, and fraud-loss tracking.

Fraud Policy Simulator

React, Vite, Scenario Modeling, Risk Strategy

- Created a scenario simulator for testing auto-review thresholds and comparing legitimate approvals, fraud loss prevented, and manual-review volume before production deployment.

Requirements-to-Risk Analyst

React, Vite, AI-Assisted Analysis, Requirements Engineering

- Developed a tool to bridge business requirements and risk analysis using AI-assisted workflows.

KRI Early-Warning System

React, Vite, KRI Monitoring, Operational Risk

- Built an operational-risk monitoring experience with threshold indicators, owner-assigned actions, health levels, trend tracking, and action digests.

EDUCATION

Master of Science in Project Management (Information Technology)

Saint Francis College

Graduated with Honors | GPA: 3.9 | Capstone: Agile Methodologies

CERTIFICATIONS

- Google Project Management: Professional Certificate — Google
- IBM Business Analyst Professional Certificate — IBM
- Enterprise Risk Management Specialization — University System of Georgia
- Forensic Accounting and Fraud Examination Specialization — West Virginia University
- Financial Risk Management Specialization — New York Institute of Finance

PUBLICATION

A Mechanism Used to Predict Diet Consumption and Stress Management in Humans Using IoMT

IEEE ICCT 2023 — Co-authored an IoMT-based framework distinguishing normal eating patterns from stress-induced behavior.
